

Real PD 4 Principals

School principals lead busy lives, creating opportunities for staff to advance their learning. We work hard to make teachers life as smooth as possible. We hardly ever find time for ourselves. I have discovered a bunch of web 2.0 tools that you will use immediately. They will make your daily job easier for you and your school.

These tools are common in many schools but I have developed them for use with Boards of Trustees and daily use for Principals.

Spend 1 day and learn for yourself, use these tools forever. We will help you download, install, show you with simple movies and give you simple take away notes. Even bring your teckie person or DP if you want.

You will need your TELA laptop. You will need to know how to install software so you might need to know a password. If you have a flash phone, iphone or ipod touch bring that too.

Wikispaces for your BOT. I will show you a living example of BOT collaboration without you

A must have communication tool for Boards of Trustees. Its free, simple and will make your life ridiculously easy.

Google Docs for Principals, Schools, Relievers, BOTs, Communities, real life examples, creative ideas on how to use GDocs in schools.

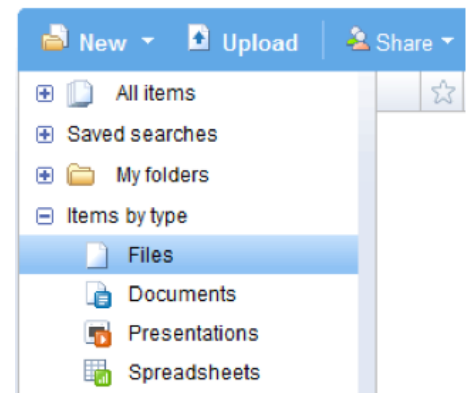

A must have sharing tool for your teachers, staff, BOT and students. It's also free, simple and easy.

RSS Readers. Examples of how to follow all the important information right to your laptop. All the MOE info, education news, follow fellow principals and children's blogs.

A must have information gatherer that means you wont miss those MOE newsletters, those news items, the important updates.

Google docs

Venue : Summerland Primary School
Professional Learning Center
