

The day starts with you waking up late and rushing about to get ready for school. You get out of the house and grab some food as you leave.

Rushing along the route to school, you notice something on the floor. You look at it, not quite sure about it, but then you pick it up. There is no one at all around. In your hand is a heavy gold ring.

Just to see, you put it on your finger. It goes on but as you twist it to take it off, there is a blinding flash and a strange sound. You fall backwards. On the floor you look up and there is a blue genie hovering above you.

It's your lucky day: the genie tells you that you have three wishes to use as you choose.

"Just wear the ring whilst you say your wish, and what you desire will be."

However, before disappearing the genie warns you to be careful what you say and what you wish for. He disappears with a flash and so the day begins ...

Creative Writing Week

Home Thinking Week 6

TASK

Describe your day and what happens.

This is a creative story so you will need to add in lots of detail.

You could start at the beginning when your alarm went off and you were rushing around the house.

OR

You could start from the end of the day - using a flashback style story.

You might want to plan what you would wish for and what happens to your wishes.

You might want to waste the wishes or have them go wrong.

This could help to make your story funny and entertaining for the reader.

Remember that you are writing to entertain so try to make your story lively and descriptive.

A L5 or higher writer will always try to include INTERNAL THOUGHT—these are thoughts that we have in our mind.

For example:

I was still standing there five minutes after the genie had disappeared.
Could it be true? Did I really have three wishes?
My mind was reeling with the idea. What should I wish for?

IMPORTANT:

No cheating — you cannot wish for a million wishes! Or more wishes.
